YASHWANTH R

Bangalore, Karnataka |8861818618 | yashwanthrb160@gmail.com | https://www.linkedin.com/in/yashu-r/ | https://github.com/Yashu818618

SUMMARY

Motivated and adaptable individual with a strong eagerness to learn and grow across diverse fields. Passionate about technology, problem-solving, and continuous self-improvement. Known for being dependable, quick to grasp new concepts, and committed to delivering quality results.

EDUCATION

BE in Electrical and Electronics Engineering
CMR Institute of Technology *2024*

Senior Secondary (XII)
Narayana PU College *2020*

Secondary (X)
New Francis English high School *2018*

TECHNICAL SKILLS

Languages: Python(Basics), PLC(basics)

Developer Tools: VS code, Arduino, Intellij, Matlab, Autocad(basics), Excel(Basics)

Technologies/Framework: GitHub

EXPERIENCE

Crest'XO (Remote) Bangalore, Karnataka
Executive Search Consultant *June 2025 – June 2026*

- Specialize in sourcing and screening executive and leadership, IT talent for US clients across diverse industries.
- Partner with clients to understand strategic hiring needs and deliver high-impact talent solutions.
- Manage end-to-end recruitment processes, ensuring a seamless candidate experience.

INTERNSHIP

Emertxe, Bengaluru (Remote) – Completed a project on Home Automation by integrating smart sensors, actuators, and IoT devices for remote control of appliances and security systems.

Karnataka Power Transmission Corporation Limited (KPTCL), Bengaluru – Gained hands-on experience in relay testing and calibration, performing functional tests and troubleshooting at substations alongside senior engineers.

PROJECTS

Intelligent Plant Surveillance system using IOT (Major Project)

- Developed a project to survillance a plant with use of embedded system integrated a soil moisture sensor, temperature and humidity sensor, PIR sensor, relay, pump to nodemcu esp8266 .
- Collected the data of sensor and displayed on blynk app and integrated a control button in it to make a plant growth automated .
- Components required: NODE MCU V3, Arduino, pir sensor, connecting wires, DHT11 sensor.
- Outcome: Use of IOT and NODE MCU.

Smart Shoes for Blind People (Mini Project)

- This project Is useful for physically challenged persons especially for blind people to sense the obstacles in front of them.
- The sensor will detect the object in front of the shoe and aware them by making buzzer sound.
- Components required: ultra–Sonic Sensor, Arduino, buzzer, connecting wires.
- Outcome: Use of Arduino chip for different purpose.
